

safeGuard

A proactive service designed to protect your IT Infrastructure.
for IBM Tivoli Storage Manager

Downtime Costs Money. Prevent it.

Paragon's SafeGuard Services for IBM Tivoli Storage Manager (ITSM) will quickly and accurately provide a comprehensive view of what is adversely affecting your enterprise backup solution. Business downtime costs money and SafeGuard Services from Paragon will help ensure your backups, DR and restore procedures are working as intended.

Optimize and Exceed Your Potential.

You may not have the time or resources to regularly validate if your enterprise backup solution is designed and managed to accurately meet your company's backup and disaster recovery (DR) objectives. Like many organizations, you may have expanded rapidly to keep pace with ever-changing business demands. Continuous change and expansion, with the ongoing pressure of resource constraints, can result in enterprise backup solutions that are not meeting backup, restore and DR objectives.

See the Big Picture.

Paragon's SafeGuard Services for IBM Tivoli Storage Manager provide a comprehensive review of your enterprise backup solution to proactively detect abnormalities that may be keeping your backups, DR and restore procedures from working as intended. Paragon will identify and document the gaps in your IBM Tivoli Storage Manager software configuration, server components, system patch levels, tape and storage pools that would potentially prevent your backup solution from working as intended.

Comprehensively Powerful Assessments.

The deliverable from Paragon's SafeGuard assessment is a report highlighting:

- Current state
- Identified issues with current environment
- Actionable recommendations for improvement
- Ongoing best practices recommendations

Why Paragon?

In addition to its extensive design, integration and support expertise with complex server, storage, high availability and enterprise backup solutions, Paragon has strong technical proficiency in innovative IT server and storage infrastructure solutions. Combine that with our project management, proven methodology and depth of technical expertise, our SafeGuard offering will ensure your company's backup, restore and disaster recovery procedures are working as intended.
